

Inspiration

update & add value

*Refresh your home with beautiful
new windows and doors*

Energy efficiency

Exceptional performance that's good news for the planet - and for your pocket.

Turn your home into a lean green energy-saving machine, by installing our PVC-U windows and doors. We can help you to reduce your carbon footprint and your energy bills in lots of clever ways.

Top environmental credentials

Our products come top of the class when it comes to environmental credentials. They have been awarded an energy rating of up to A+ and are made of a material that's achieved a BFRC (British Fenestration Rating Council) Green Guide A rating.

But there's even more. Our products are designed to provide excellent U-value ratings for their efficiency at keeping the heat in your home - and the very best levels of Window Energy Rating (WER).

Planet-friendly features

Our products are packed full of clever features like plastic thermal reinforcements made from 100% recycled material to keep in more heat, to advanced glass that can reflect heat back into your home and capture free heat from the sun through solar gain. Most importantly, our products are also designed so that they can be collected and recycled back into new PVC-U products.

Turning things around

Rising energy costs, cold homes, global warming, we're helping to address these important issues. Our windows cleverly include some non-visible recycled PVC-U window content, such as the reinforcement bars that are fitted inside the opening frame profiles to provide added strength and thermal efficiency. Unlike some other options out there, our PVC-U windows can be recycled up to 10 times with a total lifespan of 400 years!

Quality

Making a change to your home? No doubt you are seeking the highest standard of quality for your new PVC-U windows and doors.

So are the experts. Our windows have achieved accreditation from the British Board of Agrément, the organisation that decides which building products are fit for purpose.

28mm thick insulated double glazed units are fitted as standard for thermal efficiency*.

Glazing beads are fitted internally for extra security.

Opening frames are fully weather-stripped and reinforced with 100% recycled PVC-U bars for added strength and increased thermal performance.

Outer frames measure 70mm front-to-back for easy replacement, and profiles are multi-chambered to prevent heat loss.

By selecting windows and doors manufactured from PVC-U rather than other alternative framing materials, you can be confident that these products will never flake, peel, rust or rot and they will provide beautiful good looks and maintenance freedom for many years to come.

*40mm triple glazed option is also available.

Casement windows

Add more character to your home.

Imagine your home with windows that are as long-lasting as they are beautiful - and as elegant as they are energy efficient. By replacing your existing windows with our PVC-U windows, you'll make your favourite place quieter, safer and more secure.

But that's just the beginning, when you're at home you'll see the difference with new windows that are the perfect colour match for your house, whether they are in White, woodgrain, Antique Oak, Mahogany.

our windows come with a Green Guide A rating, so they'll help to shrink your energy bills. This warm feeling will last as long as your new windows. Throughout their long lifespan, they'll remain as virtually maintenance-free, efficient and attractive as they were on day one. So by replacing your windows you could add more value to your home.

Why not make your favourite place in the world even more special?

- Quieter, safer and more secure
- Perfect match for your home
- Energy efficient to reduce energy bills
- Virtually maintenance free
- Adding value to your home

From top opening to side opening designs, there are practical choices to suit the look and use of every room.

Bay windows

Add more light and space to your home.

Wouldn't you love some added space? Now you can have it - simply by replacing your existing windows with our bay windows.

Picture what that extra space would do for your house. A better view, whether you're outside or inside. Outside, you'll enjoy the new updated look. Inside, you'll notice that the room feels more spacious. You can choose from White, woodgrain

- Added space and classic style
- Thermally efficient
- Secure locking hardware
- A range of glazing options
- White, woodgrain or Artisan colours

A stylish upgrade to provide more space, more light and enhanced security.

Protect your family with our securely locking windows.

Colour options

To create added impact with your replacement windows and doors, just add a splash of colour!

Woodgrains

In addition to White, we offer three woodgrain shades with our windows and doors - elegant Mahogany, warm Golden Oak and gorgeous Cherrywood.

Expressing yourself with these colours isn't limited to just one selection. For example you can specify White on the inside and your woodgrain colour of choice on the outside. So your PVC-U windows and doors will look great from every angle.

All of our colour options deliver the practical advantages of PVC-U windows - energy efficiency, security and low maintenance.
